Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rubin (2,731,766) in view of Austin (2,896,372). Regarding claim 1, Rubin discloses a toy comprising a base board (1) having a plurality of cutouts (18) and a plurality of puzzle pieces (3-9) with shapes corresponding to the cutouts. However, Rubin does not provide different images on both sides of the pieces.

Austin reveals a doll including indicia on front and rear sides (Figures 1 and 3, respectively) that is different for indicating different sides of the doll. It would have been obvious to one of ordinary skill in the art to provide the pieces of Rubin with different images on both sides of the pieces in order to show back/front sides or left/right sides of the animals.

Regarding claims 2 and 3, the limitations for the pieces to be positioned “in the order as that of the assembly” and “positioned randomly” have been determined to be related to the intended use and function of the puzzle pieces and not positively define the structure. For example, the order of assembly would relate to the directions provided with the puzzle and not be limited by any structural limitations of the puzzle per se. Therefore, the layout of cutouts provides by Rubin is considered to be positioned in both the order of assembly and be randomly positioned and rotated in various degrees.

Art Unit: 3711

Regarding claim 4, note column 1, lines 63-65 of Rubin teaching the use of plastic for the base board. It would have been obvious to one of ordinary skill in the art to also manufacture the pieces from plastic in order to take advantage of that material's well known physical characteristics.

***Conclusion***
